

The next orders from JSC Rubezhnoye Cardboard & Package Mill – continuation of the cooperation

PMP Intelli-Reel™ during pre-assembly at PMPoland

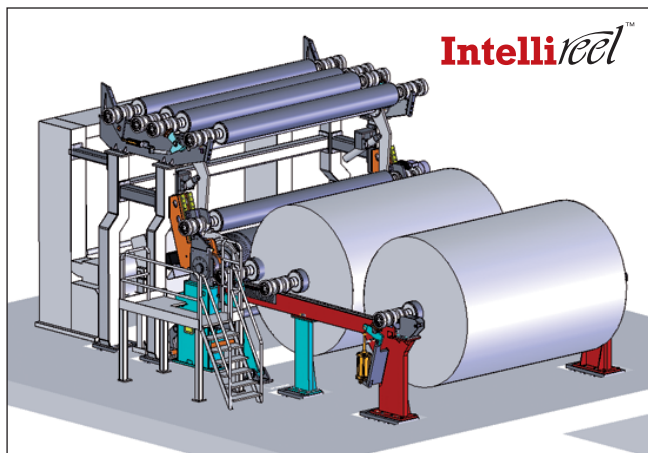

PMP Intelli-Reel™ after assembly at customer's site

We would like to announce that after successful PM#2 modernization PMP & **JSC Rubezhnoye Cardboard & Package Mill** will continue the fruitful cooperation. Just to remind the story: the scope of supply of PM#2 modernization was the new Intelli-Jet V™ headbox with CP,

the new Intelli-Nip™ Press and the new Intelli-Reel™. The PM#2 start-up took place in December 2006 and brought a lot of satisfaction for both sides. The result of the modernization fully met the Customer's expectations and at the same time prepared the machine

to achieve better efficiency result. After the first stage of the modernization, the speed was increased up to 650 mpm but PMP equipment was designed and adjusted to higher working speeds in the future. Cardboard & Package Mill. In January 2008, PMP finished the modernization of PM#1. This time scope of supply covered a new Intelli-Reel™. The equipment was installed on the PM#1 which produces boards (100-350 gsm). The reel trim is 4280 mm and max. operating speed is 800 mpm.

to achieve better efficiency result. After the first stage of the modernization, the speed was increased up to 650 mpm but PMP equipment was designed and adjusted to higher working speeds in the future.

After these fruitfull actions PMP received the next order from JSC Rubezhnoye

PMP also participates in a project dedicated to the PM#3 modernization in the same paper mill. PMP equipment will be installed in the wire end of the machine. The PM#3 produces white top liner, gypsum board line and testliner, the operating speed is 750 mpm and the reel trim is 2870 mm. The successful modernization allows to increase the speed of the machine. The delivery of the equipment is scheduled for the first quarter 2008.
