

Paper Line European Projects

PM#1 Modernization for Paper Factory *Niederauer Mühle* Ltd Germany

Niederauer Muehle GmbH, Germany

Assembly of PMP equipment at Customer's site

In March 2007 PMP received the next order from **Niederauer Muehle GmbH** in Germany which is a leading supplier of white corrugated medium paper. The Customer chose PMP as a supplier, based on the good results of PMP Intelli-Jet V™ headbox delivery in 2006. At the end of September 2007, PMP finished the next project which covered the manufacturing and assembly press elements and wire parts. The equipment was installed on the PM#1 which produces packaging papers. The speed of the machine is 600 mpm and the width is 2700 mm. We are sure, that these successful projects allow us to continue the precious cooperation between our companies.

PMP has won the project for PM#1 Modification for Smurfit Kappa Roermond Papier BV, Netherlands

After successful PM#3 modernization in 2005 and 2007 PMP & Smurfit Kappa Roermond Papier BV will continue the fruitful cooperation. In January 2008 PMP received the order for the PM#1 modification for **Smurfit Kappa Roermond Papier BV**.

The result of the previous modernization fully met the Customer's expectations and at the same time prepared the machine to achieve better efficiency result.

This time PMPoland SA – member of PMP Group will supply the equipment for the dryer part of PM#1 which produces fluting and liners. PM#1 speed is 800 mpm and the wire width is 5420 mm. PMP will provide the paper mill with engineering works, equipment for the dryer part and assembly services. The equipment delivery and assembly at customer's site are scheduled on April 2008.

Smurfit Kappa
Roermond Papier
