

PMP successfully finished the PM#2 modernization for JSC Rubezhnoye Cardboard and Package mill, Ukraine

In December 2006 PMP successfully completed the modernization for JSC Rubezhnoye Cardboard and Package mill - a main fluting producer in Ukraine. This project is a big step of PMP on the Eastern European market because of the fact of installing the first extended nip press Intelli-Nip™ designed and manufactured by PMP. Besides the delivery of the new press, the scope of supply covered also

PMP key products such as Intelli-Jet VTM with Consistency Profiling System and a new PMP Intelli-Reel™ was also delivered.

The equipment was installed on PM#2 which produces fluting papers and its max sheet width is 2540 mm. After the first stage of the modernization the PM speed was increased up to 650 mpm. The equipment is adjusted to higher working speed in the future.
