

# The first headboxes have been shipped to Asia

In the last issue of our PMP Promotional Magazine Summer 2006, we have informed you that in June last year PMP won a significant order from a large Pulp & Paper Group in Asia for the delivery of 30 new hydraulic headboxes. The group is one of the world's leading pulp and paper companies and is ranked the largest vertically integrated pulp & paper producer in Asia, excluding Japan.

At the beginning of 2007, we have entered the phase of final manufacturing of the first batch of headboxes. As the result some of them were shipped to their destination and will be installed in the nearest future, on new, medium-size tissue machines located in Asia. The equipment supply defined in the contract is scheduled to be completed within the following 24 months. The Customer chose PMP as a reliable partner to execute the important part of its expansion plan in Asia. This order from China and Indonesia reflects PMP's growing presence on the Asian tissue manufacturing market.
