

Tissue Line After Start-up

PMP completed PM#3 tissue reel rebuild for Fabryka Papieru Piechowice S.A. (Wepa Group), Poland

PM#3 reel after rebuild

In October 2006, PMP completed the contract for the PM#3 reel rebuild for FPP S.A. located in Piechowice, Poland. FPP (since some months connected with Wepa Group) produces recycled waste papers tissue products within the range of 26-48 gsm and creates the brand names like Irys, Och and Afne.

Within the confines of the dry end modernization of the tissue machine, PMPoland provided the significant reel modification. The goal of works was to ensure proper structure of parent rolls, spool starter operation improvement, installation of the efficient tail threading system and possibility of increasing the parent roll diameter up to 2200 mm.

The scope of supply covered: a new tail threading system, new primary & secondary arms and the entire reel section height adaptation. In addition, PMP was responsible for assembly at site and start-up supervision.

All modernization goals were met in the time frame defined by the contract.

QUALITY COUNTS IN HYGIENE PAPER

We have been producing hygiene paper for more than 50 years. That is the rapid rise of a medium-sized company from a small paper wholesaler to a highly-regarded manufacturer of hygiene paper. A company which in the past four years invested 130 million euros in the modernisation and expansion of the production.

Manufactured on 9 paper machines more than 300.000 tons of tissue-toilet-paper, handkerchiefs, kitchen towels, facial tissues and hand towels leave the WEPA paper mills in Arnsberg-Müschede, Marsberg-Giershagen, Kriebethal/ Saxonia, Ejea de los Caballeros/ Spain and Piechowice/ Poland each year.

The development and production of high-quality private labels has been our core competence for decades and is the most important part of our brand strategy.

Competent production and performance, open to innovation, always looking for what is feasible.

Your innovative private label specialist
