Summary of PM#5 press section modernization for Tela-Kimberly Switzerland GmbH, August 2005

We are pleased to announce the successful PM#5 press section modernization for Tela-Kimberly Switzerland GmbH. The main purpose of this project was to renovate the press section structure and to improve press functionality through changing press nips. After modernization the results are better than agreed in the contract. The customer appreciated the good quality of work related to the press modernization. Many thanks and congratulations for everyone who was involved in this project.

Photo 1 PM#5 press section after modernization

We would like to announce that in May 2005 the contract for PM#5 press section modernization between PMPoland S.A. - member of PMP Group and Tela-Kimberly Switzerland GmbH has been signed.

The mill, located in Balsthal, produces tissue papers for deep coloured napkins and technical papers. PM#5 is a tissue machine of sheet width 2160 mm and operation speed of 900 m/min.

The main purpose of this modernization is to renovate the press section structure and to improve press functionality through changing nip. The equipment supply is scheduled to be completed until the end of July 2005 whereas the erection and start-up will be held in August 2005.
