We would like to remind that in September 2007, PMP signed the contract with Anhui Bilun Tissue Paper Co. (Smile) for a new tissue machine. The company has ordered a 51 tonne/day crescent former tissue machine from PMP.

The Intelli-Tissue™ 900 machine has a design speed of 1150 m/min, maximum operating speed of 1100 m/min and a reel trim of 2.82 m. The machine will be able to produce virgin fiber-based tissue in the basis weight at reel from 13-18 gsm.

PMP's scope of supply covers stock preparation, approach flow system, entire machine including auxiliary systems like lubrication system, steam & condensate and vacuum system and steam box. Start-up is set to follow at the beginning of 2009.

At the end of August 2008 PMP Intelli-Tissue™ 900 machine was pre-assembled in our new facility in China: PMP IB (Changzhou) Machinery & Technology. It was the first project that was made by our colleagues from China. PMP Intelli-Tissue™ 900 machine for Smile was also an attraction during the Opening Ceremony of PMP IB.

2007年9月，PMP集團于安徽比倫生活用紙有限公司簽約合作，為其量身定做一款日產量為51公噸的新月型高速環保衛生紙機。

Intelli-Tissue™ 900型衛生紙機設計車速為1150m/min，最大操作速度可達1100m/min，卷紙幅寬為2.82m。該機器可以用於生產定量為13-18gsm的原漿衛生紙。

PMP集團的供貨範圍包括漿料製備，流漿系統，整機包括輔助系統，如潤滑系統，蒸汽冷凝系統和真空系統以及蒸汽箱。計劃在2009年年初開機。

2008年8月底，PMP集團的Intelli-Tissue™ 900型衛生紙機在中國的新工廠—艾博（常州）機械科技有限公司成功地進行了預安裝，這也是由中國同事接手的第一個項目。PMP集團為客戶量身定做的Intelli-Tissue™ 900型衛生紙機在艾博公司的開業典禮上引起廣泛關注。
