Yuen Foong Yu (YFY) Family Paper (Beijing), has brought its brand-new tissue machine on stream at its new mill located in Beijing area, China. Trial runs began at the end of last month and as a result the first paper on reel was produced on 25th November at 15.40, earlier than it was expected. Starting from 11th December this year the company is producing salable paper.

cal drives, oil lubrication system, steam & condensate as well as machine controls and instrumentations. The TM produces tissue in a basis weight range of 13-31.3 gsm for conversion into facial tissue, toilet rolls and kitchen towels.

This current project, part of YFY's investment program, is designed to achieve a combination of reasonable investment costs and high productivity. Cooperation

between YFY and PMP Group helps to reach these goals perfectly. This is also a significant step in building partnership relationships that brings the benefits for both sides.
